

Louisiana Chapter report for 2012

The single cab aermotor fire tower that was located at the Louisiana Department of Agriculture and Forestry headquarters at Natchitoches, LA has been successfully moved to the Southern Forest Heritage Museum in Lonfleaf, LA. It was erected there with the top two support sections only and weatherproofed. The museum would like to locate a firefinder since the original did not make the move and open the tower to the public. The remaining support material is at the museum, if anyone is interested, especially to trade for a firefinder. The state donated this to the museum instead of tearing it down and selling it as scrap.
